ACKNOWLEDGEMENT

I have great pleasure in the submission of this project report entitled "**Brain Tumor Prediction Using Deep Learning : A Hybrid Ensemble Approach with ResNet50, MobileNet , VGG 16** " in partial fulfilment of the degree of Master of Computer Application. While submitting this Project report, I take this opportunity to thank those directly or indirectly related to project work

I would like to express my sincere gratitude to **Dr. Pushpalata Pujari, Head of Department of Computer Science And Information Technology**, for her continuous support, guidance, and encouragement throughout the completion of this project. Her valuable insights and motivation have greatly contributed to the successful execution of this work

I am deeply thankful to my project guide, **Dr. Ratnesh Prasad Shrivastava, Assistant Professor** for his constant guidance, constructive suggestions, and unwavering support. His expertise and encouragement helped me overcome challenges and improve the quality of this project. I would also like to extend my gratitude to all the faculty members and my friends who directly or indirectly contributed to the successful completion of this project. Finally, I would like to thank my family for their constant support, encouragement, and understanding, which helped me complete this project successfully
